

Nuffield Group has been re-imagining one of its more popular services, workshop facilitation, to offer a new way to provide support in a post-COVID, new normal, environment.

We are experts in workshop facilitation for HAZOPs, CHAZOPs, HAZIDs, SILs, ENVIDs, Aspects and Impact workshops, Change management and Risk assessments.

Traditionally, these workshops are successfully conducted in conference rooms face-to-face, which enables high quality interaction and engagement over the course of a day, a week or longer.

However, we have found that many workshops can be conducted more efficiently online.

A virtual workshop

Match the right experts with the right experience in our virtual workshop room, providing all the benefits of face-to-face meetings

Reduces travel time and expense

Flexible scheduling to meet diverse needs

Provides everyone with the same experience and ability to contribute

Enables additional expertise to be available on demand

Allows clients with very remote sites, personnel and/or operations to collaborate in real-time workshops

40%

Half day virtual workshops are typically 40% cheaper compared to a half day face to face workshop.

Our approach is not about facilitating a workshop virtually, it's about facilitating a virtual workshop

Dedicated
remote workshop set-up for facilitator

Increased
participation by all team members in planning and preparation

Voice video and chat functionality for full collaboration and real time information exchange

Everyone attends via a video conference, so everyone has the same experience

We deliver

- Workshops through various video conferencing software; Zoom, Teams, Webex etc.
- Facilitators and scribes who are experts in the particular workshop discipline (HAZOP, HAZID etc).
- Co-ordinated preparation prior to a workshop and preparation of a Terms of Reference document for all participants.
- Reports documenting the workshop proceedings within two business days of the workshop.
